WISA XT toilet systems

WISA presents a new line of toilet systems called the WISA XT. The XT systems are only 38 cm wide, and allow either mechanical or pneumatic operation. The XT systems are available in three different heights: 83cm, 98cm and 112cm. On the 83cm and 98cm systems you can choose between top or front control. The 83cm version is ideal in situations where you have limited space, for instance under a bathroom window. When installing the top control panel it allows to open the toilet seat without covering the control panel.

Ø

Well-designed on the outside, and smart on the inside.

During development of the XT system WISA was assisted by an elaborate team of installers. The practical experience of these professionals show that aspects like easy installation, reliability, failure costs, but also efficient processing and aesthetics play an important role. This knowledge, combined with Wisa's many years of experience in developing flushing systems was the basis of this new line of XT toilet systems.

Turn every flush of the toilet into a cleaning with WISA

CLEAN. This unique concept

ensures that all users will

experience every visit to the

toilet as clean and hygienic.

Optional:

The 83cm and 98cm systems allow both front or top control

Because of the XT 83cm frame being so compact it allows easy installation, for instance under a window or behind your bath tub.

Control panels

WISA XT control panels are available in two versions: The mechanical panels, characteristic by its rectangular design, and the pneumatic panels with their round push buttons. The control panels can be used in front or top operation, and are available in ABS plastic in white, with a shiny or matt chrome finish. Or with a stainless steel cover.

The XT toilet systems are equipped with a PE discharge elbow (90mm) and a PE eccentric adaptor (90x110mm). Optional: For difficult to reach sewage pipes use the flexible WISA Flexifon Built-In.

Very compact frame. Only 38 cm wide and 14 cm deep.

very easily be checked with the meter-level stickers. Adjustable installation up to 20 cm.

WISA XT concealed cisterns are supplied with a pre-installed water connection. There is ample room for the installation work.

The pre-installed wall

The WISA XT 83 cm and the XT98 cm allow front control operation as well as top control operation

The XT systems are standard equipped with mechanical operation.

Like the XT 83cm frame, the 98cm frame is also very compact. The height of 98cm allows to open the lid of the toilet seat without covering the control panel.

Easy change to pneumatic operation is possible on all XT systems.

When installing the toilet bowl at 40cm the WISA XT 112cm frame is ideal when tiling with standard 30cm tiles.

With the yellow parts like the masonry aid or pipe covers your installation is protected against construction debris.

Optional: With the WISA CLEAN portal (art.nr. 8050800095) you can easily add a FrescoTablet into the water content of the cistern.

With one click the flushing volume can be changed from 6 to 7,5 litres, and back. This can be done without even having to remove the valve.
