

REVIT BIM LIBRARY

Toilet seats

User Manual

With the help of this document, it is possible to apply the WISA products in projects which are build up in design program Revit.

This document also provides a short explanation of the parameters to be used.

The toilet seats of WISA are designed as face-based elements. De host of the toilet seats must be chosen at the seat height of the toilet.

The naming of the families are fully compliant with the DRS and have the following structure:
RSen_74_Pf_FB_toilet seat + name product_wisa

The types within families have the following structure:
color_wisa_name product
