WAVEDESIGN BY WISA

The bathroom is a space for you to enjoy. For a nice fresh start to the day, to rinse all your cares from you after a long day, or simply for letting off steam. The bathroom has changed from being a practical space to a place for relaxation. With WAVEDESIGN BY WISA ultimate enjoyment is within everyone's reach.

QUALITY

To enjoy your bathroom to the full, you want certainty. Sureness that everything works, that it requires a minimum of attention and that you can enjoy it as much as possible. Then WAVEDESIGN BY WISA is all you need. WISA has been supplying quality and innovation in sanitary ware and fittings all over the world for 150 years now. And the many years of experience in quality products for bathrooms is in our genes.

TRADITIONAL DUTCH

WISA is a traditional Dutch company and has been supplying sanitary ware and fittings since 1865. We have grown from being a manufacturer of cast iron cisterns in the early years to a market leader in sanitary flushing technology with a comprehensive product range for the whole bathroom. Ranging from the most innovative sanitary flushing systems to a complete range of ceramics. From toilet seats to all kinds of water-saving solutions. From our head office and our production location in Arnhem we work on your bathroom every day.

DESIGN

Because you want your bathroom to be beautiful as well as comfortable, ergonomics always plays a role in our designs. For example, we are all getting taller and taller. Therefore we have baths that are extra deep, long or wide. And all baths are designed to be pleasantly supporting, whether you are alone or together.

DURABILITY

If you invest in a new bathroom, you want to be able to enjoy it for a long time. Therefore you choose durable materials. And that is also what we do. Our baths and shower trays are made of European sanitary acrylic and reinforced with fiberglass. The acrylic ensures a smooth, dyed surface which is easy to clean. Moreover, it rapidly adjusts to the water temperature and its insulating properties ensure that the water in your bath stays hot for a long time.

WHIRLPOOL PRODUCTION

The WISA whirlpool production line in Arnhem not only installs systems in its own baths, any other bath can be fitted with a whirlpool system too. The whirlpool programme has 12 versions, to match all tastes.

BUILT-IN BATHS

- The water content specified is calculated up to the overflow; for 1 person, deduct approximately 70 litres
- The interior [bottom] size is calculated approximately 5 cm above the base of the bath
- The total height of a bath is approximately 3 cm more than the stated depth
- The baths are supplied without bath feet
- The bath feet [art.no. 5050401134] are adjustable between 10 and 15.5 cm and you should add this height to the total height when you install the legs under the bath

*The retail prices mentioned in this brochure are exclusive of VAT.

AMARANTE

BUILT-IN BATH

The Amarante is a bath that stands out due to its simplicity and spacious internal dimensions. Its stylish design ensures that this bath will be just as modern in 10 years as it is now. The right side is slightly steeper than the left side, which also allows comfortable showering in the Amarante. As a result, the base of the bath is also very large, making it comfortable for tall people to lie in, even in the 170x75 cm version.

The wide back and lumbar support on the left side of the Amarante offer a great deal of comfort when lying in the bath and as the waste is located in the middle, the Amarante is suitable for two people.

FILIA

BUILT-IN BATH

With the Filia, the corner bath with its symmetrical shape deserves a nice spot in the most contemporary bathroom. The design of its interior allows you to lie or sit anywhere in the Filia. Next to each other, opposite of each other, alone, together or with the whole family; because the back ends with lumbar support in the Filia continue in all three corners and two corner sides. Depending on how tall you are, you will always find a comfortable seat. The Filia, romance assured!

DIANTHE

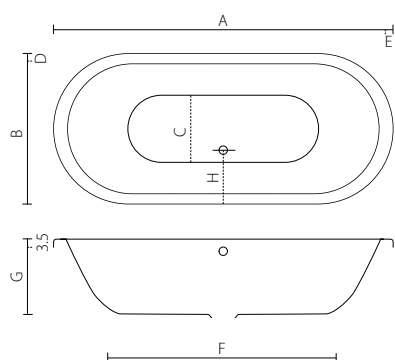

BUILT-IN BATH

BUILT-IN BATHS

Nowadays, a design is only good if it has no unnecessary frills. The Dianthe is a good example of this. The modern bath edge runs around the whole bath and retains its shape everywhere. This way, an oval-shaped bath can be very stylish.

The Dianthe is perfectly suited for a presentation on or under a platform or [semi] freestanding, integrated in mosaic. The Dianthe gives you the ultimate wellness feeling.

EVANTHE BUILT-IN BATH

The choice for a bath with a minimalist design does not necessarily have to be at the expense of comfort as is proven by the Evanthe.

This stylish bath has symmetrical edges at the front and back. Both back ends are rounded on the inside and have comfortable lumbar supports. The edges of the bath offer space for a bath edge tap or the control button of the massage system.

RODANTE BUILT-IN BATH

The special hexagonal shape of the Rodante automatically makes a bathroom exclusive. This is a multi-purpose bath and therefore a challenge for the creative designer to work with. The right side is slightly steeper than the left side, allowing comfortable showering in the Rodante, if desired. The straight lines of the Rodante make it a logical choice for the contemporary bathroom. The Rodante has two symmetrical sides on which you can install a bath edge tap or a whirlpool control button. As the hexagonal Rodante is also available in the size 200x100 cm, it is a good alternative to the bigger corner baths which measure 145x145 cm.

DORE

BUILT-IN BATH

WAVEDESIGN

The Dore is the perfect solution for those situations where you cannot fit in a standard bath. Moreover, the Dore is an attractive and robust bath for situations where additional walking space has to be created or where a standard bath would obstruct the opening of a [shower] door.

Its minimalist shape makes the Dore a timeless appearance in the contemporary bathroom and the bathroom of tomorrow. Even though the Dore is a relatively small bath, this model with its depth and spacious internal dimensions offers a high level of comfort.

PELAGIA BUILT-IN BATH

The Pelagia is an attractive, elegant bath for situations where additional walking space has to be created or where a standard bath would obstruct the opening of a [shower] door. The Pelagia is the best choice for those situations where you cannot fit in a standard bath. Its smooth faceted edge gives the Pelagia a friendly, elegant look.

Even though the Pelagia is a relatively short bath, this model with its width, depth and spacious internal dimensions offers a high level of comfort.

BASILIA

BUILT-IN BATH

The Basilia is the only bath where optimal design and comfort meet. The smooth bath edge of the Basilia makes it a suitable bath for the most contemporary bathroom. The comfortable inside of the Basilia makes it a suitable bath for the most fanatical and experienced bather. The round back ends and the lumbar supports of the Basilia follow the shape of your back to perfection. Your arms are supported by 2 high armrests, allowing comfortable reading in the bath. The width, shape and position of the armrests also allows them to serve as footrests to prevent small persons from slipping in the bath. The Basilia offers the highest level of comfort and the best design for everyone.

BASILIA SHOWER BUILT-IN BATH

If it simply is not possible to fit a bath and a shower into one space, the Basilia Shower is the alternative. If you need to shower in the bath, the Basilia Shower is a bath that will make your really happy.

Its stylish design makes it timeless and its multifunctional inside makes it attractive. The Basilia Shower has an extra slanting rest end and extended armrests. Combined with the spacious base, the Basilia Shower is therefore also a perfect bodyform bath even if you do have sufficient space for a separate shower!

SEPARATE BATH CUSHIONS FOR BUILT-IN AND FREESTANDING BATHS

Optimal comfort

DOLCE 1

The DOLCE 1 model gives your AGAPE bath an even more exclusive look and offers lots of extra comfort as it supports both your head and your back. The width of the DOLCE 1 is 34 cm and the length 40 cm. The polyurethane gel allows you to position and remove it innumerable times and, what's more, it is antibacterial.

art.no. 5050401115

€ 163.08

DOLCE 2

The DOLCE 2 bath cushion has a smooth rectangular shape and is particularly suitable for baths with a straight back area. The width of the DOLCE 2 is 36 cm and the length 14 cm. The polyurethane gel allows you to position and remove it innumerable times and, what's more, it is antibacterial.

art.no. 5050401116

€ 147.79

DOLCE 3

The DOLCE 3 bath cushion model gives your bath both a playful and stylish look. The DOLCE 3 is particularly suitable for baths with a rounded back area. The width of the DOLCE 3 is 39/23 cm and the length 18 cm. The polyurethane gel allows you to position and remove it innumerable times and, what's more, it is antibacterial.

art.no. 5050401117

€ 122.31

DOLCE 4

The DOLCE 4 particularly offers good support to your neck and ensures that your head remains in a stable position. The stylish DOLCE 4 fits in almost every bath and has a width of 30 cm and a length of 7 cm. The polyurethane gel allows you to position and remove it innumerable times and, what's more, it is antibacterial.

art.no. 5050401118

€ 96.83

DOLCE 5

A DOLCE 5 model gives your bath an even more exclusive look and offers lots of extra comfort as it supports both your head and your back. With a width of 24 cm and a length of 60 cm, the DOLCE 5 is quite a sizeable cushion. The polyurethane bath cushion can be positioned and removed innumerable times and, what's more, it is antibacterial.

ELENA

FREESTANDING BATH

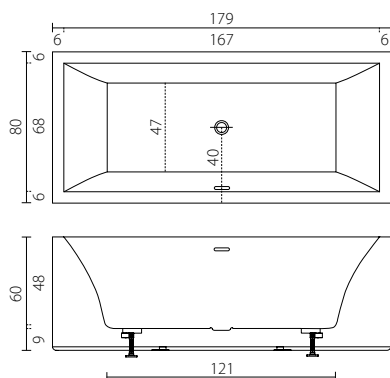

FREESTANDING BATHS

If modern has to be really modern, then Elena is the bath for you. The straight lines of the upper side do not compromise and also return in the bath surround, which runs all the way to the floor at a full 90 degree angle. Due to advanced product technology, the inside of the bath and the straight surround are seamlessly and completely merged together.

The Elena does not have a standard round overflow button, but is fitted with a nice slim overflow slot which prevents the bathwater from running over the edge.

The Elena makes your bath the eye-catcher of your new bathroom.

FREESTANDING BATH

Slim and sophisticated. The Blanca with its beautiful feminine shapes is a very attractive bath. The Blanca is the bath for you when you also like to enjoy relaxing in hot water together. The spacious internal and external dimensions offer enjoyment for two.

The Blanca does not have a standard round overflow button, but is fitted with a nice slim overflow slot which prevents the bathwater from running over the edge.

If you want a combination of design and comfort, the Blanca is the bath for you.

WELLNESS OPTIONS:

- THAI 4 SILENT SPA massage system with 24 mini air jets, whisper-quiet pump and electronic switch with LED. **€ 2,070.00**

CARLA

FREESTANDING BATH

The Carla, with its slightly convex-shaped bath surround has the appearance of a friendly, attractive bath. Despite the compact external dimensions, the Carla has a lot of space to offer inside. Its lovely rounded back ends make sitting comfortable in the Carla, also when you are not alone. The Carla does not have a standard round overflow button, but is fitted with a nice slim overflow slot which prevents the bathwater from running over the edge. If you are looking for timeless design, then the Carla is a good choice for you.

IRENE

FREESTANDING BATH

The Irene is a modern masterpiece. With its stylish and ingenious design, this space-saving back-to-wall solution offers the luxury of a freestanding bath, with a subtle twist. The bath is designed to be installed in the centre of the wall, allowing for extra space on both sides for a washbasin, toilet, vanity unit or shower area. This makes the Irene the perfect addition for every bathroom and gives the space feminine elegance.

TREAT YOUR FEET

To optimal comfort and safety

SHOWER TRAYS

- The legs of the shower tray must be ordered separately [except for shower trays with a front panel]
- The total height of a shower tray is approximately 3 cm more than the stated depth
- The shower tray feet [art.no. 5050401134] are adjustable between 10 and 15.5 cm and you should add this height to the total height when you install the legs under the shower tray

*The retail prices mentioned in this brochure are exclusive of VAT and apply as from 1 April 2014.
The models with prices in bold print are supplied from stock.*

AIR MASSAGE

WATER [HYDRO] MASSAGE

AIR AND WATER [HYDRO] MASSAGE

The best-known and most frequently applied wellness article is the whirlpool or, rather, the massage bath. The reason why, of course, is that many people choose to install a bath in their [new] bathroom. The upgrade from bath to whirlpool is usually a simple step which does not necessarily have to be a big investment, especially when you depreciate it over the average service life of a bathroom, which is 20 years.

The choice for a whirlpool starts with the model of bath you choose. They are available in many shapes and sizes, as you have seen in this brochure. Most important when making this choice is that you are comfortable when you lie in your bath and get wet all over, so also your knees and shoulders! When choosing your massage system, make sure the water jets massage the desired place on your body and you do not have to struggle to achieve this.

You can choose a massage bath with an air system, a water system or a combination of the two. The air system produces hundreds of bubbles for a lovely relaxing feeling and an effective lymph drainage, whereas the water system provides the well-known hydro massage for a deep muscle massage. The hot water and the hydro massage enhance blood circulation. Waste products, such as [lactic] acids are flushed out quicker, thereby reducing muscle ache and joint pains. People with narrowing of the capillaries, varicose veins and cellulite will also benefit from a hydro [water] massage system. As a higher vascular volume is achieved, a relaxing hydro massage bath helps when your blood pressure is [too] high. An important point of attention regarding hydro massage is the correct position of the water jets. If you have a back problem, it is sensible to choose a system with [extra] back jets.

We offer a Wavedesign massage system that suits everyone's budget and wishes. The systems can be made to match all your wishes. Just like any other massage, you are massaged there where you require it.

The following pages provide you with information on the WATSU, REFLEX, SHIATSU and THAI systems of WAVEDESIGN.

We wish you many relaxing moments...

WATSU MASSAGE SYSTEM

The WATSU massage system is a very sound system with pneumatic control. This attractively-priced massage system is equipped with adjustable water jets for an intensive massage. Do you want more? Then opt for a Reflex, Shiatsu or Thai massage system.

WAVEDESIGN

WATSU WATER [HYDRO] MASSAGE SYSTEM

The WATSU water massage system has 6 big water jets and 2 jets in the foot zone, a pneumatic on and off switch with a control button for air mixing [which makes it possible to adjust the power of the water jet], a safety base suction and a waste/overflow combination.

The adjustable water jets ensure a powerful and effective hydro massage

WATSU

WATER [HYDRO]MASSAGE SYSTEM

6 big adjustable water jets
2 adjustable foot jets
Pneumatic control
Control button for air mixing
Safety base suction
Including bath waste/overflow combination

If you want the jets and control button installed in different places, please state this on the order form [see page 63].

[the bath is not included in the price of the system]

We urgently recommend that you use the order form on page 63 for your order.

REFLEX MASSAGE SYSTEMS

The REFLEX massage systems are top quality systems for an attractive price. Compared to other, cheaper massage systems, which usually have a pneumatic push button, the REFLEX systems all have an electronic control button with blue LED lighting. To switch the system on an off only you only have to touch the control button. With the exception of the display, the other components used in the REFLEX system are the same as those of the more expensive SHIATSU systems. So with a REFLEX massage system you upgrade your bathroom to a Wellness space without it making enormous inroads on your budget, which means double enjoyment!

WAVEDESIGN

REFLEX 1 AIR MASSAGE SYSTEM

The REFLEX 1 air massage system has 12 air jets, and electronic on/off switch, automatic blow-clean function, dry run protection, preheating and a waste/overflow combination. As the air is preheated in the blower, the air massage feels comfortable and does not cool off the bath water quickly.

REFLEX 2 WATER [HYDRO] MASSAGE SYSTEM

The REFLEX 2 water massage system has 6 big water jets and 2x2 mini jets in every back zone, an electronic on/off switch with a control button for air mixing [which makes it possible to adjust the power of the water jet], a dry run protection, a safety base suction and a waste/overflow combination.

REFLEX 3 AIR AND WATER [HYDRO] MASSAGE SYSTEM

The REFLEX 3 air and water massage system is a combination of the two above systems, the REFLEX 1 and the REFLEX 2.

The **base suction** allows the water jets to be positioned lower in the bath, compared to a system with side suction, resulting in the hydro massage being much more effective. This is due to the massage jets actually touching your body in the right place. Furthermore, the base suction also ensures a better drainage of the residual water from the pipes and the pump.

The adjustable water jets ensure a powerful and effective hydro massage

REFLEX 1

AIRMASSAGE SYSTEM

12 air jets
Electronic fingertip control with LED
Air pre-heating
Automatic blow-clean function
Dry run protection
Including bath waste/overflow combination

If you want the jets and control button installed in different places, please state this on the order form [see page 63].

SHIATSU MASSAGE SYSTEMS

The SHIATSU massage systems all have many functions as standard to ensure you have a relaxing time in your massage bath. The ultra level display with fingertip control is integrated in the edge of the bath. As standard this display is equipped with the latest LED technology, so that you can always see which function you activated.

WAVEDESIGN

AIR MESSAGE

The blower on the air system is equipped with a heating element, which [pre]heats the supplied air. This ensures that the bath water does not cool off quickly and the air massage always feels pleasant. The display allows for infinite adjustment of the power of the air massage. By activating the interval function you can vary the power of the air massage in a continuous cycle from powerful to gentle. As soon as the bath water has run away, the automatic blow-clean function becomes operational, which ensures that no residual water remains in the air pipes under the bath. The dry run protection ensures that you cannot activate the system when there is no water in the bath.

WATER [HYDRO] MESSAGE

The water [hydro] massage system is supplied as standard with base suction technology. This means that the pump draws in the water via the waste. The advantage of which is that no suction grille is required [aesthetically more pleasing] and that the jets can be positioned lower, ensuring that the water jets will actually touch your body. As the suction pipe of the pump is directly connected to the waste, the residual water in the pipes and pump are drained off better. The waste has a relief valve which ensures that the pump stops working the instant the supply of water is obstructed for whatever reason. You can control the power of the massage by adding air to the water jet. Instead of a separate rotary button on the edge of the bath, the SHIATSU system is operated electronically. The pulsator function turns the air mixing on and off in succession and the interval function switches the pump on and off in succession. The dry run protection ensures that you cannot activate the system when there is no water in the bath.

AUTOMATIC PROGRAMME FUNCTION

All SHIATSU and THAI massage systems are equipped as standard with a unique programme function. With the programme button you activate the automatic massage programme. During the pre-programmed period of 15 minutes, all massage options of the system are activated alternately, together or separately. While you are dreaming away and enjoying the lovely varied massage, the system does the work. Total relaxation, that was what you wanted, wasn't it?

SHIATSU 1

AIRMASSAGE SYSTEM

12 air jets
Electronic fingertip control with LED

THAI MASSAGE SYSTEMS

The THAI massage systems all have many functions as standard to ensure you have a relaxing time in your massage bath. The ultra level display with fingertip control is integrated in the edge of the bath. As standard this display is equipped with the latest LED technology, so that you can always see which function you activated. As for operation and electronic options, the THAI systems are the same as the SHIATSU systems. The major difference lies in the experience of the various massages.

WAVEDESIGN

AIR MESSAGE

The air massage system is equipped with an air pump instead of a blower. This provides an extra relaxing massage, since the air pump hardly makes any noise. The air is distributed over no less than 24 air jets so that your whole body is really touched by thousands of air bubbles making their way to the surface of the water. Due to the whisper-quiet air pump and the extra small air bubbles you experience the massage as if you were lying in a bubble bath.

WATER [HYDRO] MESSAGE

The keen user of a hydro massage system does not know what is happening to him or her when he or she gets into the THAI water [hydro] massage bath. No less than 30 nano jets provide a memorable back massage. Every part of your back, from the small of the back up to the shoulders is massaged by the small nano jets. The size of the nano jets and the distribution of pressure ensure that the skin will not become irritated and you can enjoy a long, unique massage. The feet are treated too; 4 mini jets do an effective job here. Enjoyment is given a whole new meaning with a THAI massage system.

CHROMOTHERAPY [FOR ALL SYSTEMS]

The effect of colours on our biorhythm is what chromotherapy is based on. Coloured waves of light create sources of energy that emit vibrations. Each colour has a specific wavelength, speed and rhythm and chromotherapy uses those properties to stimulate or normalise poor energy flows within the body. Not only does chromotherapy have a beneficial effect on your body and mind, the many colours, such as blue, green, yellow and red, also give your bathroom warmth and atmosphere. You can activate the colours separately or have them run in cycles.

The chromotherapy option and the white underwater lighting can also be ordered without the massage system, for the same price. The chromotherapy and the white underwater lighting is then operated by a touch button that is also used for the REFLEX 1 system.

WAVEDESIGN MASSAGE SYSTEMS

The Wavedesign massage systems are assembled and manufactured per order. The advantage of which is that your massage bath can be customised to your requirements.

SYSTEM COMPONENTS

The system components [pump, blower and control unit] are located under the bath and must remain accessible after the bath has been installed, for example by means of an access hatch [min. 40x40 cm]. If you have opted for an air or combination system, a ventilation opening has to be installed in the bath surround. The drawings above show the indications you have to take into account for the access hatch. If you want to have the system components in another place under the bath, then please indicate this clearly by means of a drawing on the order form [see opposite page]. It is possible that they will extend outside the edge of the bath.

Bath waste/inlet combination
[art.no. 5050401087]

VISIBLE PARTS

The visible parts [display, air and water jets] are made of chrome and can be custom-installed in the places you request. Please indicate these desired positions on the order form [see page 65]. If there is no specific indication, the positions of the visible parts will be determined by the factory.

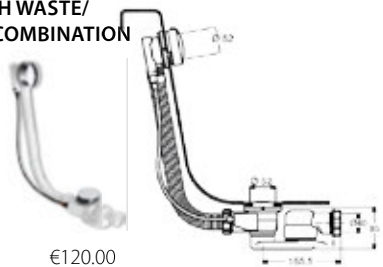

Whirlpool cleaner

MAINTENANCE

The pipes and fittings around and under your bath must be cleaned periodically, just like your bath, because they come into contact with [dirty] bath water during bathing, even when you are not using your system. We therefore recommend that you flush your system once a month with 100 ml whirlpool cleaner [art.no. 5050401120]. We also recommend that you only use bath perfume or bath salts in your massage bath. When using bath oils, you should ensure that they have an emulsifying effect [dilute completely in water] and do not leave an oily rim around the bath.

ACCESSORIES

BATHS [BUILT-IN AND FREESTANDING] SHOWER TRAYS MASSAGE SYSTEMS

It is exactly because a bath comes into close contact with your skin that it should adapt to your body and not the other way round. The Wavedesign baths and shower tray range is specially designed to provide you with all the comfort you need. In addition to the timeless design, you benefit from all the advantages the high-quality acrylic can offer. We provide a 10 year manufacturer's guarantee, which assures the quality of our acrylic baths and shower trays. Treat your body to that moment of maximum relaxation and benefit from the functional design of our Wavedesign baths and shower trays.

With one of the many Wavedesign massage systems, you transform your bathroom into a true wellness space. A space not only for taking care of yourself, but also for relaxation. The purchase of a massage bath is first and foremost an investment in yourself. And in these hectic times it is important to find your moment of peace and enjoy the moving water which provides a welcome relaxation. If you suffer from ailments such as muscle aches and joint pains, high blood pressure or blood circulation problems, the purchase of a massage bath is a sensible choice. Bear in mind that the average service life of a bathroom is 20 years. The choice you make now will probably also be a great benefit to you later. The purchase of a massage system is also an investment in your home, as a luxury bathroom is high on the wish list of many people. The manufacturer's guarantee on the Wavedesign massage systems is 2 years. Any problems are rectified quickly and professionally at your home.

All the products in this catalogue are represented as accurately as possible. Changes in design or sizes are of course always possible and may be done without prior notification. WISA BV cannot be held responsible for any differences. The dimensions of the baths/shower trays may differ from the stated dimensions due to technical reasons. Differences in price, model, colour and dimensions are subject to change. All the prices in this edition are retail prices exclusive of VAT and can be changed without prior notification.
