REVIT BIM LIBRARY
Connectors

User Manual

With the help of this document, it is possible to apply the WISA products in projects which are build up in design program Revit.
This document also provides a short explanation of the parameters to be used.

Connectors of WISA are designed as non-hosted elements.
The naming of the families are fully compliant with the DRS and have the following structure:
RSen_52_PIF_UN_etim description + name product_wisa

The types within families have the following structure:
etim description_wisa_name product
